PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on Python development experience through internships and personal projects. Strong foundation in Python, Object-Oriented Programming (OOP), Data Structures, Algorithms, File Handling, Exception Handling, Debugging, and Problem Solving. Experienced in developing command-line applications using modular programming, JSON, file handling, and Python standard libraries. Familiar with Git and GitHub for version control. Seeking a Python Developer or Python Intern position to apply programming skills in a professional software development environment.

TECHNICAL SKILLS

Programming: Python **Core Concepts:** OOP, Data Structures, Algorithms, Recursion, Problem Solving

Programming Techniques: File Handling, Exception Handling, Input Validation, Debugging, Modular Programming

Python Modules: JSON, datetime, uuid, os **Tools:** Git, GitHub, Version Control

INTERNSHIP EXPERIENCE

ArchTechnologies — Python Developer Intern | **October 2026 – Present**

- Develop Python-based applications and apply programming concepts to practical development tasks.
- Implement problem-solving, debugging, and application development techniques.
- Use Git and GitHub for version control and project management.

CodeAlpha — Python Programming Intern | **September 2026**

- Completed a Python programming internship involving practical programming and development tasks.
- Applied Python programming, problem-solving, debugging, and application development concepts.

DecodeLabs — Python Programming Intern | **August 2026 – September 2026**

- Completed a Python programming internship with hands-on experience in Python development.
- Applied Python programming concepts to practical projects while strengthening debugging and problem-solving skills.

PROJECTS

Bank Account Management System | **Python, OOP, Dictionaries, Input Validation**

- Built a command-line banking application supporting account creation, deposits, withdrawals, PIN authentication, and transaction history.
- Applied classes, constructors, encapsulation, dictionaries, loops, and input validation.

View Project on GitHub

Library Management System | **Python, OOP, Data Structures, Input Handling**

- Developed a command-line library management application for books, multiple copies, issuing/returning books, searching, and student borrowing records.
- Applied OOP, dictionaries, lists, loops, string methods, and input handling.

View Project on GitHub

Student Result Analyzer | **Python, OOP, Exception Handling, Type Hints**

- Developed an application to manage student marks, calculate totals and averages, assign grades, determine pass/fail status, and identify top-performing students.
- Applied classes, instance methods, list comprehension, match-case, type hints, exception handling, and built-in functions.

View Project on GitHub

Fast Ticket Booker | **Python, Modular Programming, JSON, File Handling**

- Built a command-line ticket booking system supporting Bus, Train, Car, and Van bookings with multiple travel classes.
- Implemented unique ticket IDs, booking history, saved receipts, automatic train discounts, JSON, datetime, uuid, os, and input validation.

View Project on GitHub

100 Days Python Code Challenge | **Python, Problem Solving**

- Completed a structured Python coding challenge focused on programming fundamentals, algorithms, debugging, and consistent problem-solving practice.
